

# SARA ARELLANO - FRONTEND DEV

Eager to learn new features and continue to challenge myself. Also, I really like being able to help my colleagues and, at the same time, learn from them.

Social, flexible, empathetic, organized and constant are qualities that define me.

\Hello World!

I'm Sara Arellano Blázquez, frontend dev with experience in JS Vanilla and CSS with SASS pre-processor. Also, I do my work scalable and generic so it can be reused, always thinking in mobile first and, of course, responsive designs. But all is no code. I try to learn every-day, teach my junior colleagues, help to organize better the team and search for new features to improve our product.

## SKILLS

### Programming

JS Vanilla  
HTML/CSS  
SASS  
NPM  
Gulp  
Node.js  
Twig  
Pug  
PHP  
Git  
Drupal

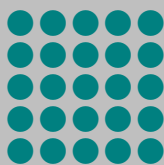

### Operating Systems

Linux  
MacOS  
Windows

### Soft skills

Teamwork  
Communication  
Creativity  
Help Juniors  
Learn quickly

### Languages

Spanish  
English

## WORK HISTORY

I've started in Selectra without knowing anything about Drupal and within a few days I was already creating components in Twig, JS Vanilla and SASS for new pages. Meanwhile, I've contributed to create Selectra's own Design System, where we use Atomic Design and all components are reusable. Also, I've implemented measures to improve SEO and our pages don't fall below a 90/100 score. I'm also responsible for 1 dev junior and I'm teaching the basic principles of programming to service engineers

In addition to programming, I participate in interviews to attract new devs, and create exercises to check the level of them.

**Technical Stack:** SASS, JS Vanilla, Gulp, NPM, NodeJS, Twig, Pug, Webpack, Drupal, Docker (basic), Sketch, Figma, inVision

📅 10/2019 - Actuality

📍 [Selectra](#)

### Account manager

I wanted to know more about business work, so I've started like an Account Manager. Attracting new customers and maintaining current ones. Functional documentation to translate the client's "language" into actions for the technical team. Meetings with clients to reflect the desired functionalities in tasks.

📅 11/2018 - 04/2019

📍 Waavi

### Junior Frontend Developer

Work in some projects using ReactJS, NodeJS, Yarn and SASS. An example of my work here is the landing page of [ESME](#)

Also, learn a bit of chat bots using DialogFlow

📅 02/2018 - 11/2018

📍 Waavi

## EDUCATION

### Web Development Bootcamp

📅 2021

📍 Udemy - [Certificate](#)

### Some courses about JS Vanilla

📅 2020

📍 Udemy

### JavaScript Advance

📅 2019

📍 Telefónica Universitat

### React.js courses
