

Sara Arellano Blázquez

Senior **Frontend** Developer · **Fullstack** Engineer

Seville, Spain (Remote) | sararellano@gmail.com | +34 663 17 63 44 | linkedin.com/in/sararellano | github.com/Sararellano | sararellano.github.io/sararellano

PROFESSIONAL SUMMARY

Frontend Engineer with **8+ years of experience** leading the frontend of large-scale **CMS** platforms (80+ sites, 50+ international domains) at Selectra. Specialized in **JavaScript/TypeScript, React, Next.js, PHP, Drupal and Laravel**, with a recent focus on integrating **AI** (Claude API, OpenAI API) into real products to automate workflows and generate personalized content. My background combines advertising with software development, giving me a strong eye for documentation and user-centered product thinking.

TECHNICAL SKILLS

Frontend: JavaScript ES6+, TypeScript, HTML5, CSS3/SCSS, Tailwind CSS, Alpine.js, React, Next.js, Vue.js, Angular, Twig/Blade, Atomic Design, BEM

Backend & Full-Stack: PHP 8+, Laravel 12, Drupal 10, Python, Node.js, REST APIs, MySQL, Composer

AI & Automation: Claude API, OpenAI API, Prompt Engineering, LLM Integration, Workflow Automation, Data Pipelines, RAG

Design & Management: Figma, inVision, Jira, Basecamp, Trello, Notion

DevOps & Quality: Git/GitHub, GitHub Actions, Docker, PHPStan, PHPUnit, Sentry, Datadog, CI/CD, Core Web Vitals

KEY ACHIEVEMENTS

- Raised PageSpeed on key pages from 57 to 100 by optimizing CLS and **Core Web Vitals** at Selectra.
- Scaled a Design System (Atomic Design + BEM) into the standard adopted by every product team, not just my own.
- Automated the update of thousands of templates with **Python** that were previously edited one by one, by hand.
- Built internal tooling to automate development tasks across our multi-site monorepo spanning 50+ international domains.
- Mentored 5 junior developers, several of whom now lead their own projects.
- Outside of work, I build my own **AI**-powered tools to keep learning (see Projects & Portfolio).

PROFESSIONAL EXPERIENCE

Senior Frontend Developer · Selectra Oct 2019 – June 2026

- Inherited a non-standardized CMS platform and have since led its frontend across 80+ sites and 50+ departments in international production.
- Designed a modular Design System from scratch using Atomic Design and BEM, later adopted by every other team, not just my own.
- Led the **CLS** optimization project that raised PageSpeed on key pages from 57 to 100 points.
- Build custom Drupal modules with **PHP 8.3** and **Drupal 10**, integrated with **Laravel 12** in a **full-stack** architecture.
- Recently integrated **Claude** API and **OpenAI** API into workflows connected to external data providers.
- Work closely with design in Figma to deliver pixel-perfect interfaces true to the mockup.
- Manage sprints and technical backlog with Jira, Basecamp and Trello across multidisciplinary agile teams.
- Query and maintain data in **MySQL** for several of the team's full-stack projects.
- Set up pre-commit quality checks and CI/CD pipelines with **GitHub Actions** and **Docker**.
- Keep Lighthouse scores above 90 through continuous monitoring in **Datadog** and **Sentry**.

Technologies & tools: Drupal 10, PHP 8.3, Laravel 12, JavaScript ES6+, TypeScript, Python, Twig, Tailwind CSS, MySQL, Figma, Jira, Basecamp, Trello, GitHub Actions, Docker, Datadog, Sentry, React, Next.js, Claude API, OpenAI API, Prompt Engineering, LLM Integration, RAG

Frontend Developer · Waavi 2017 – 2018

- At this agency, I built responsive websites and landing pages for international clients using React and JavaScript, adapting workflows to each client's requirements.
- Designed conversational interfaces and integrated chatbots with DialogFlow (Google).
- Collaborated with design, business and development teams using Scrum methodology.

Technologies & tools: React, Node.js, JavaScript, SASS/CSS3, DialogFlow

Account Manager & Digital Project Manager · Waavi 2018 – 2019

- Owned client relationships and digital project management end-to-end, from briefing to delivery.
- Translated often-ambiguous business requirements into concrete technical tasks for the development team.
- Coordinated communication between stakeholders and technical teams, acting as a bridge between both worlds.

PROJECTS & PORTFOLIO

AI Job Agent – AI-Powered CV & Cover Letter Generator (in progress)

Full-stack SaaS application built with Next.js (App Router) and TypeScript that generates tailored CVs and cover letters from a job listing. Integrates Claude API and OpenAI API with prompt engineering to match the candidate's profile to the company's language.

Stack: Next.js, React, TypeScript, Claude API, OpenAI API, Prompt Engineering, Vercel | [ai-job-agent-chi.vercel.app](#)

V16 Emergency Beacon Interactive Map – Spain

Web application that visualizes the real-time location of active V16 emergency beacons across Spain.

Stack: JavaScript, Leaflet.js / Mapbox, REST API, HTML5, CSS3 | [balizas-v16-pink.vercel.app](#)

Personal Historian – AI-Guided Personal Biographer

AI-guided journaling app that turns memories into a personal biography through one reflective question per day. The AI generates contextual questions tailored to each user's story.

Stack: Next.js, React, TypeScript, Claude API, Vercel | [ai-personal-historian.vercel.app](#)

Momento Wow – Event Websites

Creation of event websites with personalized invitations tailored to each client's and event's requirements.

Stack: Next.js, React, TypeScript, Claude API, REST API, Supabase, Vercel | [momento-wow-main.vercel.app](#)

EDUCATION

BA in Advertising & Public Relations · Universidad Rey Juan Carlos I 2007 – 2013

Master's in Digital Marketing · EOI – Escuela de Organización Industrial 2016

Master's in Frontend Development · Generation Spain + McKinsey & Company 2017

Frontend Development Course · Universitat Telefónica 2018

ADDITIONAL TRAINING & CERTIFICATIONS

- React, Angular, Vue.js, Advanced JavaScript, MySQL – Udemy
- AI Product Development & LLM Applications – integrating LLMs into real products
- Advanced Frontend Development – JavaScript ES6+, TypeScript, React Fundamentals
- CI/CD Workflows – GitHub Actions, Docker, DevOps fundamentals
- AI Workflow Automation & Data Pipelines

LANGUAGES

Spanish: Native English: B1/B2 – Upper Intermediate (fluent technical reading, professional written communication)
